

The Proof Is In The Data

At Ag Partners, our skilled team members are always looking at ways to help our growers drive increases in yield and profit per acre. One key opportunity we have identified to help our grower accomplish these goals is by doing a fungicide application to both corn and soybean crops.

approved paraquat training.

Updates to be made to Main Office Phones

Beginning **Wednesday, March 11, 2020**, the main office in Seneca will transition to an automated phone answering system. When contacting the main office, you will be able to dial the direct extension of the person you are trying to reach or choose between the following options:

Press 1: Grain

Press 2: Fuel & Propane

Press 3: Accounting & Billing

Press 4: Mr. Tire Service Center

Press 5: Operator (or remain on the
line)

*Direct extension numbers were sent
out with the March monthly
statements.*

Gramoxone/Paraquat Training Requirements

Recent regulations now require that in order to spray Gramoxone®, growers must have a certified applicators license and take the online safety training at usparaquattraining.com. This applies to anyone spraying or handling the product.
