

## Start Clean in 2020

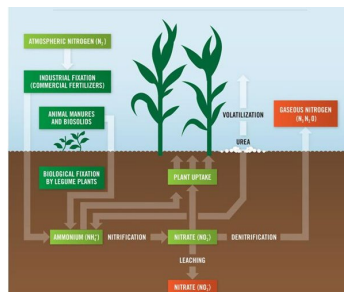

In preparation for the 2020 growing season, growers have the option to perform fall burndown applications to help increase their chances of having cleaner fields at planting time.

## Boosting Bushels Tip of the Week

In an Ag Partners Local Solution Trial, 17% more nitrogen was shown in the top 12 inches of soil, along with up to 9% more nitrogen in the root zone, and a 6 bu. per acre boost when a nitrogen stabilizer was applied with nitrogen.

This diagram provided by Koch Agronomic Services illustrates how nitrogen is made available for plants as well as the various mechanisms for loss.
