

BIN PROBE TRUCK SERVICE

Agtegra offers a professional bin probe service for your farm. Our technically trained operator will collect a representative sample using specialized equipment from all levels of your bin.

You will receive an analysis of your grain quality, along with a customized marketing proposal for each bin. It is a unique and effective way to help you make better marketing decisions.

Benefits:

- Make better marketing decisions with more thorough knowledge of your inventory.
- Reduce the risk of surprise grades upon delivery. With our quality pricing guarantees, you know the quality pricing component of your grain before delivery.
- Gain confidence in the storability of your grain. A whole bin probe may provide a tipoff of potential storability issues.
- Qualify for additional Agtegra marketing programs. We will make special offers based on the quality for the grain in each bin probed.
