

WE ARE FARMER OWNED WITH A FORTUNE 500 MINDSET.

We are rooted in the idea that meaningful sustainability is farmer owned and farmer driven. As a farmer-owned cooperative, Land O'Lakes SUSTAIN advances system-wide efforts that balance the need for family farms to deliver a successful harvest with the need to protect the health of our shared environment. Land O'Lakes is uniquely positioned to connect sustainability across the food value chain because our network touches every step.

IN THE UNITED STATES, WE REACH:

- 25 percent of farmers
- 50 percent of harvested acres
- 30 percent of animal proteins
- 90 percent of retail grocery outlets

HOW WE WORK:

- Starting from the ground up, our on-farm dairy sustainability approach measures each of our dairy farm's environmental profile, providing the data needed to create customizable conservation solutions. Tailored plans help the efforts of farmers to create meaningful change in a way that best supports the needs of their farm and family.
- Our on-farm dairy sustainability approach delivers data and metrics to help farmers and companies support claims and verify sustainability stories.
- We bridge the gap by connecting micro, acre-by-acre, conservation efforts, and macro, company-level sustainability commitments.
- We work to connect every link in the food supply chain with the understanding that no one farmer, company, conservation group, or government entity can scale sustainability on their own.
- Our vision, coordination and network offers the unmatched scale needed to apply sustainability across many acres.
