

A Commitment to Turf Appeal.

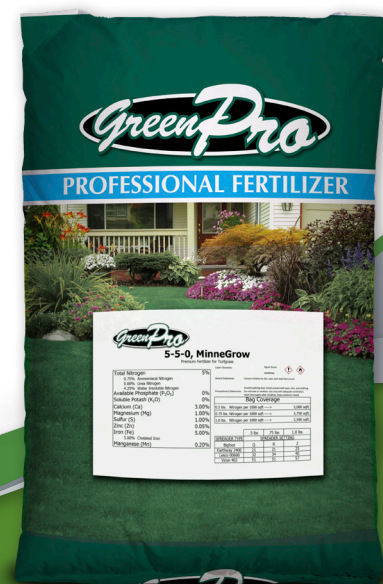

BCA Products is excited to be the exclusive distributor of MinneGrow. This highly concentrated bio-solid produced in Shakopee, Minnesota is considered a type EQ (Exceptional Quality) product. Evenly sized particles slowly feed the turf up to 10 weeks while the extra concentrated iron content quickly turns grass a vibrant green. MinneGrow is high in organic nitrogen and 12 other nutrients including 3% calcium, 1% sulfur and 1% magnesium. This clearly makes MinneGrow the best bio-solid in the industry.

MinneGrow is extremely versatile. It makes a great stand-alone fertilizer as well as a nutritious filler for traditional blends. Contact your BCA Representative for more information.

Features and Benefits of Minne-Grow

- Incredibly high fertilizer content 5-5-0 with 5% iron 3%, calcium, and 1% magnesium

About us...

BCA Products has been manufacturing lawn care fertilizers and ice melt for businesses in the Midwest for over 30 years. We service the professional turf markets and retail merchandisers through branded and private labeled products sold through distributors.

At BCA Products, we have designed our facility to allow the production, storage and ordering process for our lawn fertilizer and ice melt products to be seamlessly efficient while still manufacturing a quality product and providing excellent customer service. Our upgraded facility helps us gain the efficiency we need to remain competitive in the lawn fertilizer and ice melt industries. In addition to expanding our storage, we have also expanded our distribution to the 7 state area of Minnesota, North Dakota, South Dakota, Wisconsin, Nebraska, Wyoming, Iowa and northern Illinois.

We like to think of ourselves as a Customer Service company that happens to manufacture Lawn Care Fertilizers and Ice Melt products. By keeping up with the latest trends in our business, our staff is second to none and works tirelessly to find new ways to be innovative and efficient. It's what we've always done.
