What inputs are eligible?

Inputs for raising corn, soybeans, wheat and specialty crops are eligible. This includes agronomy prepay purchases as well as fall, spring and summer inputs. Home heating fuel does **not** qualify.

What is the financing rate?

We offer three levels... determined by the percent of your corn and soybean acres planted with seed sold by Ceres.

What product/service prices are used?

The prepaid or cash price in effect at the time of billing will be used for products and services such as custom application and delivery.

When do finance charges begin?

Charges are calculated from the date of invoice when product is picked up, or for prepaid product, the effective date of the prepay to receive the desired prepay price.

What happens if my purchases fall short of my commitment?

The financing rate will be adjusted to the level that was met and made retroactive to the invoice date.

What paperwork is required?

An application (complete the quick online app!), note, contract and tax returns are required. In some cases, a crop lien and crop insurance will also be required.

No one is more invested in your success than your local Ceres Solutions Team.
