

Scouting Program

With Co-Alliance Directive Field Scouting, you receive a truly coordinated program featuring the latest technology and personalized service to help you maximize your value per acre.

- Geo-referenced field points professionally assessed five times by trained Co-Alliance Scouts
- Immediate access to reports through **DataOnTouch®** for faster interpretation and response to situations
- Ability to discover in-field issues and evaluate options before significant loss or damage occurs
- One meter **aerial imagery** and **corn yield estimation**
- Included in the Complete Solution Bundle or as a stand-alone option
- Optional, customized tissue testing (available at additional cost)

Benefits

We scout, identify, and manage issues impacting your profitability, so you can:

- Gain critical data
- Validate decisions
- Make timely, informed decisions
- Find out the value of applied products
- Reduce plant stress
- Experience increased yields
- Detect issues and deficiencies
- Accurately time/apply fungicide and chemistry
- Improve yield check with free imagery

DataOnTouch: Scouting and More

DataOnTouch is the web-based and mobile system developed by Co-Alliance for convenient and easy access to the data you need for better decision-making, including Scouting. Check out all the features of DataOnTouch.

Scouting: Free, instant access to real-time and historical reports with your Scouting Program enrollment

Accounting: Easy and convenient access to your account including statements and invoices

Grain: Ability to place and track bids, offers, & sales. Commentary, futures, options prices, historical pricing, and USDA reports.

Maps: Direct access to your mapping data for real-time decision making and future planning

WeatherView®: Local, in-depth weather data from the Co-Alliance Weather Network in a proprietary app

Education: How-to videos for each DOT and additional content
