

Weaned Calf

Purina® All Seasons™ Cattle Nutrition Program

# Purina® Stress Care® 5 Starter Supplement

## Starter Supplement for Fed Cattle

Stress Care® 5 is a pelleted, semi-complete feed with RX3™ Immune Support Technology designed to be fed at 5 pounds per day to starting calves along with hay or grass (minimum 8% DM protein).

### FEATURE

### BENEFIT

Balanced nutrition

22% protein pellet formulated with vitamins and minerals to provide the correct balance of nutrients required for starting calves to encourage intake, health and weight gains.

Palatable

Encourages calves just weaned off cow and/or stressed during transportation to begin to eat dry feed and recover from the stresses of weaning and shipping.

Specifically formulated to prime the immune system, to help support calves' overall health, reduce costs and set calves up for a healthy future.

Rapidly restores trace mineral levels to support the immune system of nutritionally challenged, stressed cattle.

Additives available

Additive options available to provide additional benefit including weight gain, control of coccidiosis and treatment of bacterial enteritis.
