

# ULTRACARE® STARTER FEEDS

**Keep the growing going**

Keep the growing going as you make the transition from pre-starters to starters with field-tested UltraCare® starter feeds. With consistent palatability and gut-optimizing ingredients, UltraCare® starter feeds help pigs maintain consumption. This can support productive gains through mid- and late-nursery, which in turn can impact feed-conversion potential.

These key gains in the nursery have been shown to predict desirable finishing weights. According to Purina® Animal Nutrition Research, every pound difference at 32 days post-weaning correlates to a nearly 2.1-pound heavier pig at finishing.<sup>1</sup>

## RESEARCH-PROVEN RESULTS

The best was made better in 2015 when Purina® updated the proven UltraCare® formula. Updates include increased palatability for a strong start and gut-optimizing technologies for continued performance through each phase. Compared to the previous UltraCare® starter feeds, the new formulation for the nursery period supported the following benefits:

- 1.66 more pounds at day 28 and 0.74 more pounds at end of nursery<sup>2</sup>
- 5.8% higher ADGs<sup>3</sup>
- 3% better feed conversion<sup>1</sup>

## FEEDING DIRECTIONS:

The UltraCare® starter feeds are specifically formulated to meet the nutrient requirements of each production phase from 14 pounds through 65 pounds. After providing a strong start with UltraCare® pre-starter feeds (UltraCare® 100, 200 and 240), follow this recommended feeding program:

*Bases and premixes are available for on-farm mixing of UltraCare® 300-700.*

PRODUCT	WEIGHT
UltraCare® 300	14-21 pounds
UltraCare® 350	17-30 pounds
UltraCare® 400	21-30 pounds
UltraCare® 500	30-45 pounds
UltraCare® 600	45-55 pounds
UltraCare® 700	55-65 pounds

## FOR OPTIMAL RESULTS

Complement this product with other products from the Purina® Progress to Profit™ Program.

The Purina® Progress to Profit™ Program includes more than 16 proven swine nutrition products that span each stage of production from pre-wean to finish. Pick and choose from these products to optimize the best solution for your operation.

When fed from pre-weaning through finishing, the Progress to Profit™ Program has been shown to support the following benefits:<sup>1</sup>

- Increases in average daily feed intake
- Increases in average daily gain
- Improved feed:gain conversion from wean-to-finish

1. Summation of Purina Animal Nutrition trials: PS1041, PS1035, WF006, WF007, FT142N-15 and PMI Nursery-Grower Transition Pak

2. Commercial Research Facility FT142N-15  
3. Purina Animal Nutrition Center WF007
