

**Effective December 13, 2022**

**FREE DELAYED PRICING ON NEW FARM DELIVERED CORN TO ALL OF OUR ACTIVE LOCATIONS.**

**FREE DELAYED PRICING ON NEW FARM DELIVERED SOYBEANS TO ALL OUR ACTIVE LOCATIONS.**

Effective December 13, 2022, we are offering free delayed pricing until **September 30, 2023** on new delivered bushels of corn AND soybeans.

We have shipped several soybean and corn trains and have adequate movement in the company.

Bins need cored, so here is an opportunity to move some bushels. Take advantage of weather breaks and sell on price rally days in the future.

**These policies are subject to space availability. We may suspend this program at certain times depending on farmer cash grain movement.**

If you are interested in delivering corn to our facilities, contact your location and let us know how many bushels. These bushels will be placed on delayed pricing contracts. If these bushels are not priced by September 30, 2023, they will be subject to a 15 cent fee on October 1, 2023, with our daily rates thereafter. They will not be automatically sold. We want to promote getting these bushels marketed before the 2023 harvest.

Bushels previously delivered are not eligible to be moved over to this program, this is strictly for new, off the farm, bushels.

**We are not calling in contracted bushels for future delivery months, beyond January. We are allowing January, 2023 contracts to be delivered now, for January, 2023 payment.**

Farmers Cooperative is an Equal Opportunity Provider.
