

WINTER STORAGE TEMPERATURE AND WEIGHT/GALLON

IMPORTANT NOTE: Weights of liquid products are provided as a guide only. Actual weight can change with temperature or modifications in formulation by the manufacturer. Calibrate bulk product metering pumps regularly to avoid significant metering errors. Some chemical suppliers provide calibration devices. Product labels should be consulted

regarding special storage precautions. Data from manufacturers and believed to be reliable.

For specific labels and SDSs:  <http://www.greenbook.net/> or <http://www.cdms.net> or <http://www.agrian.com/home/>

STORAGE TEMPERATURES and WEIGHTS (Always check weight on bill of lading)

BULK PRODUCTS: ALWAYS CHECK THE WEIGHT LISTED ON THE MANUFACTURER'S BILL OF LADING.

w = May be stored at temperatures below freezing, but warm to 60° (some products may require agitation).

NSP = No special precautions.

* If stored below freezing, then recondition by warming to temperature listed in parentheses () and agitate. If no temperature is given, then recondition by warming and agitation.

** Weight at 68° F. Weight will change with temperature and with formulation changes.

¹ If good agitation or recirculation is not possible, store above freezing.

² If stored below 45° F or above 90° F, product may phase. Allow temperature to moderate then agitate or recirculate before using.

³ See label.

Hornet - allow package to warm before handling (>32° F).

⁴ Cornerstone 5 Plus 10.2 - 42750 label; 10.14 - 1381=240 label.
