

Product Information

Triad is a Powerful Hormone-based Formulation Designed to Maximize Yield

Triad combines the power of Cytokinin (Kinetin), Gibberellic Acid (GA) and Indole-3-Butyric Acid (IBA) at the right ratio and right concentration to enhance the overall health and growth of the plant. The correct balance of these three hormones is critical for maximizing plant performance and yield potential.

For use on: Corn, Soybeans, Wheat, Cotton and other row crops

Application Instructions:

4 - 8 oz/A

Timing: Foliar

Can be added to:

- Foliar fertilizer
- Herbicides
- Fungicides/Insecticides

Can be applied through irrigation
