

Technical Recommendation

Quilt Xcel[®] for Disease Management and Enhanced Physiological Benefits in Grain Sorghum in Kansas, Nebraska, and Colorado

- Quilt Xcel is a broad-spectrum, preventative fungicide with systemic and curative properties recommended for the control of many important diseases in grain sorghum.

Untreated

Enhanced Physiological Benefits

- Quilt Xcel is a member of Syngenta's Plant Performance[™] product line and may also improve the yield and/or quality of grain sorghum.
- These additional benefits are due to positive effects on plant physiology and may vary according to the condition of the crop and environmental factors.

General Information

- Apply 10.5 oz./acre for control of Anthracnose, Ergot, Grey Leaf Spot, Ladder Leaf Spot, Leaf Blight, and Zonate Leaf Spot.
- For Ergot control, make the first application at or just prior to flowering. Repeat on a 5-7 day schedule.
- For other diseases, apply at the first sign of disease OR mid-boot to late flowering stage.
- Can be tankmixed with Warrior II with Zeon Technology[®] insecticide or Besiege[®] insecticide during flowering for sorghum headworm control.
- Quilt Xcel may be applied by ground or aerial application.
- Do not apply within 30 days of harvesting forage or 21 days of harvesting grain or stover.
- Do not apply more than 56 fl. oz/A of Quilt Xcel per crop.
