Benefits

Brush control made easy

Remedy® Ultra herbicide simplifies brush control with tank-mix and treatment-method flexibility. It is the perfect choice for all types of brush control — from light, scattered encroaching brush to treating moderately dense infestations to reclaiming large tracts from mature, established, mixed brush.

Give Feedback

A solid foundation with flexible control

Tank-mix flexibility makes Remedy Ultra an excellent foundation on which to build all types of brush control programs. Tank-mix with GrazonNext® HL herbicide to broaden the brush control spectrum and to control understory broadleaf weeds.

Protect, enhance, restore the land

Remedy Ultra offers the flexibility in treatment methods and tank-mix combinations to design programs that stop encroaching brush, selectively enhance sensitive sites or reclaim large tracts overrun by brush. Treatment programs with Remedy Ultra help meet multiple land-use goals, from restoring or improving livestock grazing to

Technical Specifications

Active Ingredient	Triclopyr
Application Rate	Apply Remedy® Ultra herbicide in broadcast applications at rates of 1 pint to 4 quarts per acre in a total spray volume of 5 or more gallons per acre by air or 10 to 20 gallons per acre by ground.
Application Timing	Treat when weeds are actively growing and not stressed by drought or other conditions. Increase the herbicide rate within the labeled rate range as the season progresses and plants become more mature. Delay foliar brush applications until target species are fully leafed out and actively growing and are not stressed by drought or other conditions.
