INGREDIENTS

Wheat Middlings, Corn Distillers Dried Grains with Solubles, Rice Mill Feed, Dehydrated Alfalfa/Timothy, Beet Pulp, Molasses Products, Soybean Hulls, Vegetable Oil with Tertiary Butyl Hydroquinone (a preservative), Calcium Carbonate, Flax Meal, Calcium Phosphate, Salt, Lysine, Zinc Methionine Complex, Manganese Methionine Complex, Copper Lysine Complex, Cobalt Glucoheptonate, Magnesium Oxide, Vitamin E Supplement, Selenium Yeast, Artificial Flavor, dl-Methionine Hydroxy Analog Calcium, Calcium Hydroxide, Ascorbic Acid, Choline Chloride, Biotin, d-Calcium Pantothenate, Vitamin A Supplement, Vitamin D-3 Supplement, Thiamine Mononitrate, Niacin Supplement, Riboflavin Supplement, Folic Acid, Vitamin B-12 Supplement, Copper Sulfate, Zinc Sulfate, Zinc Oxide, Manganous Oxide, Manganese Sulfate, Sodium Selenite, Cobalt Carbonate, Calcium Iodate, Propionic Acid (a preservative), Acetic Acid, Ammonium Hydroxide, Magnesium Aluminosilicate, Sodium Bentonite, Calcium Bentonite, Sodium Propionate (a preservative), Sorbic Acid (a preservative).

FEEDING DIRECTIONS: Co-op Pinnacle Maturity is designed to be a nutritionally dense complete feed for older horses or those that do not consume forage well. As a complete feed, Co-op Pinnacle Maturity can replace all or some of the forage in a horse's diet. Follow recommended feeding rates below. Feed similar amounts at the same time each day to minimize digestive upset. Monitor the horse's body condition and adjust feeding practices to maintain an appropriate level of condition. If feeding a grain ration at a rate of 0.5 lb per 100 lb of body weight per day or more, divide total amount into 2 or 3 individual meals offered over 10 to 12 hours. Avoid abrupt changes in feed or forage type. Implement any changes to the diet over a 7- to 10-day transitional period. Changes in the amount of a grain ration should not exceed 1.0 to 1.5 lb per day. Provide free-choice access to clean, fresh water and salt at all times. Store feed in a dry area protected from insects and rodents.

FEEDING GUIDLINES:

	Feeding Rate*		
	Ponies (600 to 900 lb)	Average Horses (900 to 1200 lb)	Large Horses (1200 to 1500 lb)
<i>Feeding With Forage</i>			
Mature, Idle	4 to 6 lb	5 to 7 lb	6 to 8 lb
Mature, Light Work	4 to 6 lb	5 to 7 lb	6 to 8 lb
Mature, Moderate Work	6 to 8 lb	7 to 9 lb	8 to 10 lb
Broodmare, Early/Mid Gestation	4 to 6 lb	5 to 7 lb	6 to 8 lb
Broodmare, Late Gestation	6 to 8 lb	7 to 9 lb	8 to 10 lb
<i>Feeding Without Forage</i>	10 to 15 lb	15 to 20 lb	20 to 25 lb

* Feeding rates are expressed as total lb of Pinnacle Maturity per head per day. When feeding with forage, feed at least 1.5 lb of good-quality forage per 100 lb body weight per day. When feeding as a complete feed with no additional forage, do not feed less than 1.0% of body weight per day unless directed by a veterinarian or nutritionist. Feeding amounts should be adjusted proportionately for horses with an ideal mature body weight of under 600 lb or over 1500 lb. Horses in heavy work, lactating broodmares and other horses requiring more calories than supplied by the feeding rates above should be switched to a more calorie-dense Pinnacle feed product designed to be fed at higher levels. Feed amounts may be adjusted up or down as needed to maintain ideal body condition. Horses consuming less than 0.5% of body weight (5 lb for a 1000 lb horse) should be switched to Pinnacle Balancer for a lower calorie, more concentrated source of essential nutrients.

Manufactured By
PROTRITION FEED, LLC
