FEEDING DIRECTIONS: Co-op Pinnacle Balancer is designed to be fed alone to fortify a forage-only diet. Follow recommended feeding rates below. Feed similar amounts at the same time each day to minimize digestive upset. Monitor the horse's body condition and adjust feeding practices to maintain an appropriate level of condition. Avoid abrupt changes in feed or forage type. Implement any changes to the diet over a 7- to 10-day transitional period. Changes in the amount of a grain ration should not exceed 1.0 to 1.5 lb per day. Provide free-choice access to clean, fresh water and salt at all times. Store feed in a dry area protected from insects and rodents.

* Feeding rates are expressed as total lb of Pinnacle Balancer per head per day. All calculations assume a daily minimum intake of 1.5 lb of good-quality forage per 100 lb of body weight. Feeding amounts should be adjusted proportionately for horses with an ideal mature body weight of under 600 lb or over 1500 lb. Horses in heavy work, lactating broodmares and other horses requiring more calories than supplied by the feeding rates above should be switched to a more calorie-dense Pinnacle feed product designed to be fed at higher levels.
