

FEED GREATNESS®

# ENRICH PLUS® SENIOR

Enrich Plus® Senior is best suited for aging easy keepers and performance horses of any age.

## ActivAge®

Aging easy keepers may not need extra calories, but they also may not be getting everything they need from hay or pasture alone.

Enrich Plus® Senior helps fill in the gaps and contains ActivAge® for immune function, mobility, and metabolism.

## Outlast®

You know that comfort for your horse means confidence for both of you.

Purina's newest ration balancer, Enrich Plus® Senior, is enhanced with Purina® Outlast® supplement to help support your senior horse's gastric health for the long haul.

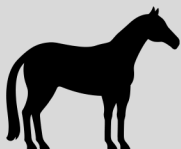

## Easy-to-Chew

Easy-Soak™ Pellet Technology creates a soft, easy-to-chew mash in minutes with added water.

## Ration Balancer

Enrich Plus® Senior is a concentrated formula of high quality protein, vitamins and minerals, and antioxidants without the excess calories. It contains a controlled starch and sugar formula made without corn, wheat, and oats.

Start your horse on Enrich Plus® Senior, contact our team!
