

SAFETY DATA SHEET

EVENT

Section 1 Product and Manufacturer Information

Manufactured for: Rosens's Inc; P.O. Box 933, Fairmont, MN 56031. Phone: 800-798-2000

For Transportation Emergencies call Chemtrec at 800-424-9300

For Other Emergencies call 911 and/or Appropriate Regulatory Agencies

Product Name: Event

Chemical Description: Adjuvant/Inorganic Salt Blend

Synonyms/Other: Proprietary Blend

Product Use: Adhesive, Adjuvants, Spreader or Stickers

Section 2 Health Hazard Identification

Warning! Eye and skin irritant. May cause allergic skin reaction. May cause allergic respiratory reaction.

Physical State: Liquid

Color: Yellow

OSHA/HCS Status: While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this SDS contains valuable information critical to safe handling and proper use of this product. This SDS should be retained and available for employees and other users of this product.

Emergency Overview: **Not expected to produce significant adverse health effects when the recommended instructions for use are followed.**

See toxicological information (Section 11)

General Information: Read the entire SDS for a more thorough evaluation of the hazards.

Section 3 Composition / Information on Ingredients

Component	CAS Reg Number	% WT/WT
PROPRIETARY BLEND	*****	> 99
GLYCERIN	56-81-5	< 1

Section 4 First Aid Measures

Eye Contact: Check for and Remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention if symptoms occur.

Skin Contact: In case of contact, wash contaminated area thoroughly with soap and water. Wash clothing before reuse. Clean contaminated clothing and shoes thoroughly before reuse. Get medical attention if symptoms occur.

Inhalation: Remove victim from immediate source of exposure and assure that the victim is breathing. If breathing is difficult, administer oxygen, if available. If victim is not breathing, administer CPR (cardio-pulmonary resuscitation). Seek medical attention.

Ingestion: Do not induce vomiting, unless directed to do so by a physician. If victim is conscious and alert, wash out mouth with water and keep at rest. Do not leave victim unattended. Vomiting may occur spontaneously. To prevent aspiration of swallowed product, lay victim on side. Seek medical attention.

Note to physician: All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred. Treat symptomatically. No specific antidote available.

Section 5 Fire Fighting Measures

Flammability Class: WILL BURN

Flash point (TCC): > 93 C (199 F).

Hazardous thermal

decomposition products: Thermal decomposition products may include: hydrogen cyanide, ammonia, oxides of nitrogen, oxides of sulfur, oxides of carbon, oxides of silicon.

Extinguishing media

Suitable: Recommended (small fires): carbon dioxide, Recommended (large fire): dry chemical, alcohol foam, universal foam, water spray.

Not suitable: Not recommended: water jet (frothing possible).

Special exposure hazards: Product will burn under fire conditions. Closed containers may rupture (due to buildup of pressure) when exposed to extreme heat.

Special protective

equipment for fire-fighters: Firefighters should wear NIOSH/MSHA approved self-contained breathing apparatus and full protective clothing.

Section 6 Accidental Release Measures

Personal precautions:

No action shall be taken involving any personal risk or without suitable training. Keep unnecessary and unprotected personnel from handling product. Put on appropriate personal protective equipment (see Section 8).

Spill Response: For wet material, dike spill and absorb with inert material and collect for disposal. Caution: Wet material is slippery. For dry powder, sweep or scoop-up and collect for disposal. Avoid creating dust clouds and breathing dust. Spills or releases to the environment may be reportable to the National Response Center (800-424-8802) and to state and/or local agencies.

Waste Disposal Method: Follow federal, state and local regulations regarding health and pollution.

Landfill or dissolve in a suitable solvent and incinerate in accordance with federal, state and local regulations.

Material is not a hazardous waste under current RCRA regulations.

Section 7 Handling and Storage

Minimum/Maximum Storage Temperatures:

39° F to 120 ° F

Storage/Handling:

Store in accordance with local regulations. Store in original container away from incompatible materials (see Section 10) and food and drink. Store in an area that is dry, well-ventilated, away from ignition sources, away from incompatible materials. Avoid breathing vapors and mists. Avoid direct or prolonged contact with skin and eyes.

DO NOT ALLOW TO FREEZE. Product will freeze if stored below 39° F. If freezing occurs, thaw and remix before using. Frozen material may be thawed in a warm room. Vent drums while heating. Mix thoroughly to assure homogeneity. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled

containers. Use appropriate containment to avoid environmental contamination. Keep out of reach of children!

Section 8 Exposure Controls / Personal Protection

Recommended monitoring

procedures: NA

Engineering measures: No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Personal Protection

Respiratory: In case of inadequate ventilation wear respiratory protection. Wear a properly fitted NIOSH/MSHA approved respirator whenever exposure to vapors or mist is likely unless levels are below applicable limits. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Splash-proof safety goggles are recommended.

Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Environmental exposure

controls: NA

Section 9 Physical and Chemical Properties

Appearance: Yellow/liquid.

Odor: Mild ammonia odor.

Freezing Point: 39°F.

pH: 5 - 6 at 100 wt/wt%

Boiling Range: NA

% Volatile by Volume: NA

Specific Gravity: 1.2 at 25 C (77 F).

Solubility in Water: Soluble

Evaporation Rate (Water = 1): < 1 (Butyl Acetate = 1)

Bulk Density: 10.00

Section 10 Stability and Reactivity

Chemical stability: The product is stable. Under normal conditions of storage and use, hazardous reactions will not occur.

Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.

Conditions to avoid: Product will freeze if stored below 32° F. Avoid contact with metal surfaces for long periods of time.

Hazardous decomposition

products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11 Toxicological Information

This material is not known to be a toxicity hazard to humans.

Section 12 Ecological Information

This material is not known to present an ecological hazard.

Section 13 Disposal Considerations

This product is not defined as a hazardous waste by the U.S.E.P.A. Dispose of this product as recommended by federal, state, and local regulations.

Section 14 Transport Information

This material is not regulated as a hazardous material by the U.S.D.O.T. Use normal transportation safety precautions.

Section 15 Regulatory Information

SARA Title III Hazard Class: Not regulated

CERCLA Reportable Quantity: Not regulated

TSCA: Not regulated

RCRA Hazardous Waste Classification: Not regulated

Clean Air Act: Not regulated

Section 16 Other Information

Disclaimer: This information relates to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is to the best of our knowledge and belief, accurate and reliable as of the date compiled. However, no representation, warranty or guarantee is made as to its accuracy, reliability or completeness. No warranty of merchantability, fitness for any particular purpose, or any other warranty, express or implied, is made concerning the information herein provided. It is the user's responsibility to satisfy themselves as to the suitability and completeness of such information for their own particular use. We do not accept liability for any loss or damage that may occur from the use of this information nor do we offer warranty against patent infringement.
