

According to OSHA Hazard Communication Standard, 29 CFR 1910.1200

Initial preparation date: 06.28.2017

Revision date: 08.20.2020

# **Chemical Vulcanizing Fluid**

#### **SECTION 1: Identification**

#### Product identifier

Product name: Chemical Vulcanizing Fluid Product code: 760, 761, 762, 765, 766, 767, 763 Additional information: Rev. 12

## Recommended use of the product and restriction on use

Relevant identified uses: Rubber adhesive Uses advised against: Not determined or not applicable. Reasons why uses advised against: Not determined or not applicable.

#### Manufacturer or supplier details

Manufacturer: North America Tech International 200 East Coshocton Street Johnstown, OH 43031 1-740-967-9015 www.tech-international.com

#### Emergency telephone number:

United States CHEMTREC Within USA and Canada: 1-800-424-9300 Outside USA and Canada: +1-703-527-3887

## SECTION 2: Hazard(s) identification

#### GHS classification:

Flammable liquids, category 2 Skin irritation, category 2 Specific target organ toxicity - single exposure, category 3, central nervous system Label elements

# Hazard pictograms:

Signal word: Danger

#### Hazard statements:

H225 Highly flammable liquid and vapor. H315 Causes skin irritation. H336 May cause drowsiness or dizziness. Page 1 of 12

According to OSHA Hazard Communication Standard, 29 CFR 1910.1200

Initial preparation date: 06.28.2017

# Revision date: 08.20.2020

Chemical Vulcanizing Fluid

# Precautionary statements:

P210 Keep away from heat/sparks/open flames/hot surfaces. No smoking.

P233 Keep container tightly closed.

P240 Ground/bond container and receiving equipment.

P241 Use explosion-proof electrical/ventilating/lighting/equipment.

P242 Use only non-sparking tools.

P243 Take precautionary measures against static discharge.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P264 Wash skin thoroughly after handling.

P261 Avoid breathing dust/fume/gas/mist/vapors/spray.

P271 Use only outdoors or in a well-ventilated area.

P321 Specific treatment (see supplemental first aid instructions on this label).

P370+P378 In case of fire: Use agents recommended in Section 5 for extinction.

P303+P361+P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

P363 Wash contaminated clothing before reuse

P332+P313 If skin irritation occurs: Get medical advice/attention

P304+P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P312 Call a POISON CENTER or doctor/physician if you feel unwell.

P403+P235 Store in a well ventilated place. Keep cool.

P405 Store locked up.

P403+P233 Store in a well ventilated place. Keep container tightly closed.

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazards not otherwise classified: None

# SECTION 3: Composition/information on ingredients

| Identification            | Name   | Weight % |
|---------------------------|--|----------|
| CAS number:<br>9003-31-0  | Natural Rubber                                   | <10      |
| CAS number:<br>64742-49-0 | Hydrocarbons, C7, n-alkanes, isoalkanes, cyclics | 75-95    |
| CAS number:<br>142-82-5   | Heptane  | <4       |

# Additional Information:

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret in accordance with paragraph (i) of the OSHA Hazard Communication Standard (29 CFR \$1910.1200).

#### SECTION 4: First aid measures

# Description of first aid measures

#### General notes:

Not determined or not applicable.

## After inhalation:

If inhaled, remove person to fresh air and place in a position comfortable for breathing. Keep person at rest. If breathing is difficult, administer oxygen. If breathing has stopped, provide artificial respiration. If experiencing respiratory symptoms, seek medical advice/attention

According to OSHA Hazard Communication Standard, 29 CFR 1910.1200

Initial preparation date: 06.28.2017

**Revision date:** 08.20.2020

Chemical Vulcanizing Fluid

#### After skin contact:

Remove contaminated clothing and shoes. Rinse skin with copious amounts of water [shower] for several minutes. Launder contaminated clothing before reuse. If symptoms develop or persist, seek medical advice/attention

#### After eye contact:

Rinse eyes with plenty of water for several minutes. Remove contact lenses if present and easy to do so. Protect unexposed eye. If symptoms develop or persist, seek medical advice/attention

## After swallowing:

If swallowed, DO NOT induce vomiting unless told to do so by a physician or poison control center. Rinse mouth with water. Never give anything by mouth to an unconscious person. If spontaneous vomiting occurs, place on the left side with head down to prevent aspiration of liquid into the lungs. If symptoms develop or persist, seek medical advice/attention

## Most important symptoms and effects, both acute and delayed

## Acute symptoms and effects:

Skin contact may result in redness, pain, burning and inflammation Inhalation may have adverse effects on the central nervous system. Symptoms may include drowsiness, dizziness, headache, nausea and lowering of consciousness. Acute overexposure via inhalation may result in respiratory distress, confusion and unconsciousness

Product is highly flammable. Exposure to sources of ignition may cause physical injury

## Delayed symptoms and effects:

Effects are dependent on exposure (dose, concentration, contact time)

#### Immediate medical attention and special treatment

#### Specific treatment:

Overexposure via inhalation requires urgent medical treatment Skin/eye burns require immediate treatment

#### Notes for the doctor:

Treat symptomatically

# SECTION 5: Firefighting measures

#### Extinguishing media

# Suitable extinguishing media:

Dry chemical, CO2, water spray or alcohol-resistant foam

# Unsuitable extinguishing media:

Do not use water jet

#### Specific hazards during fire-fighting:

Highly flammable liquid. Will be easily ignitable by heat, sparks or flames. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back. Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks). Vapor explosion hazard indoors, outdoors or in sewers. Runoff to sewer may create fire or explosion hazard. Containers may explode when heated. Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation

# Special protective equipment for firefighters:

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full-face piece operated in positive pressure mode

#### Special precautions:

Evacuate non-essential personnel. Ventilate closed spaces before entering. Consider initial evacuation for

According to OSHA Hazard Communication Standard, 29 CFR 1910.1200

Initial preparation date: 06.28.2017

**Revision date:** 08.20.2020

## Chemical Vulcanizing Fluid

300 meters in all directions. If tank/rail car is involved in the fire, ISOLATE for 800 meters in all directions. Fight fire from a maximum distance. Move containers from fire area if you can do it without risk. Use water spray/fog for cooling fire exposed containers. Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank. Always stay away from tanks engulfed in fire. For massive fire, use unmanned hose holders or monitor nozzles. If this is impossible, withdraw from area and let fire burn. Stand by, at a safe distance, with extinguisher ready for possible re-ignition. A vapor-suppressing foam may be used to reduce vapors. Avoid unnecessary run-off of extinguishing media which may cause pollution. Do not handle damaged containers unless specialized to do so

## SECTION 6: Accidental release measures

# Personal precautions, protective equipment and emergency procedures:

Evacuate unnecessary personnel. Ventilate area. Extinguish any sources of ignition. All equipment used when handling the product must be grounded. Wear recommended personal protective equipment (see Section 8). Avoid contact with skin, eyes and clothing. Avoid breathing mist. vapor, dust, fume and spray. Do not walk through spilled material. Wash thoroughly after handling

#### Environmental precautions:

Prevent further leakage or spillage if safe to do so. Prevent from reaching drains, sewers and waterways. Discharge into the environment must be avoided

## Methods and material for containment and cleaning up:

Do not touch damaged containers or spilled material unless wearing appropriate personal protective clothing. Stop leak if you can do it without risk. A vapor-suppressing foam may be used to reduce vapors. Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers for future disposal. Dispose of in accordance with all applicable regulations (see Section 13)

#### Reference to other sections:

For personal protective equipment see Section 8. For disposal see Section 13

## SECTION 7: Handling and storage

#### Precautions for safe handling:

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating and lighting equipment. Take action to prevent static discharges. Handle containers with caution. Use appropriate personal protective equipment (see Section 8). Use only with adequate ventilation. Avoid breathing mist/vapor/spray/dust. Do not eat, drink, smoke, or use personal products when handling chemical substances. Avoid contact with skin, eyes and clothing. Wash affected areas thoroughly after handling. Keep away from incompatible materials (See Section 10). Keep containers tightly closed when not in use.

# Conditions for safe storage, including any incompatibilities:

Store in cool, dry, well-ventilated location out of direct sunlight. Keep away from food and beverages. Protect from freezing and physical damage. Store away from heat, open flames and other sources of ignition. Keep container tightly sealed. Store away from incompatible materials (See Section 10).

#### SECTION 8: Exposure controls/personal protection

Only those substances with limit values have been included below.

#### Occupational Exposure limit values:

| Country (Legal Basis) | Substance      | Identifier | Permissible concentration                                    |
|-----------------------|----------------|------------|--|
| ACGIH                 | Natural Rubber |            | ACGIH TLV TWA: 0.0001 mg/m <sup>3</sup> , inhalable fraction |

# According to OSHA Hazard Communication Standard, 29 CFR 1910.1200

Initial preparation date: 06.28.2017

**Revision date:** 08.20.2020

Chemical Vulcanizing Fluid

| Country (Legal Basis)      | Substance | Identifier | Permissible concentration                                    |
|----------------------------|-----------|------------|--|
|                            | Heptane   | 142-82-5   | 8-hour TWA: 400 ppm  |
|                            | Heptane   | 142-82-5   | 15-minute STEL: 500 ppm                                      |

| United States (OSHA)       | Heptane   | 142-82-5   | 8-hour PEL-TWA: 2000 mg/m <sup>3</sup><br>(500 ppm)          |

## **Biological limit values:**

No biological exposure limits noted for the ingredient(s).

# Information on monitoring procedures:

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. Biological monitoring may also be appropriate for some substances.

## Appropriate engineering controls:

Emergency eye wash fountains and safety showers should be available in the immediate vicinity of use or handling.

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapor and mists below the applicable workplace exposure limits (Occupational Exposure Limits-OELs) indicated above. Use explosion-proof ventilation equipment.

# Personal protection equipment

# Eye and face protection:

Safety goggles or glasses, or appropriate eye protection.

# Skin and body protection:

Select glove material impermeable and resistant to the substance.

For continuous contact we recommend nitrile gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified.

Glove thickness should be typically greater than 0.35 mm depending on the glove make and model. Always seek advice from glove suppliers.

#### **Respiratory protection:**

If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.

Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection.

Use a NIOSH/MSHA approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced. Comply with the OSHA respirator regulations found in 29 CFR 1910.134.

#### General hygienic measures:

When handling chemical products, do not eat, drink or smoke. Wash hands after handling, before breaks, and at the end of the workday. Avoid contact with skin, eyes and clothing. Wash contaminated clothing before reuse. Perform routine housekeeping.

#### Other information

voc

650 g/L

# SECTION 10: Stability and reactivity

# Reactivity:

Does not react under normal conditions of use and storage.

#### Chemical stability:

Stable under normal conditions of use and storage.

#### Possibility of hazardous reactions:

None under normal conditions of use and storage.

#### Conditions to avoid:

Excess heat, ignition source or flames.

#### Incompatible materials:

None known.

#### Hazardous decomposition products:

None known.

# Chemical Vulcanizing Fluid

# SECTION 11: Toxicological information

## Acute toxicity

Assessment: Based on available data, the classification criteria are not met.

Product data: No data available.

Substance data:

| Name                         | Route      | Result                              |
|------------------------------|------------|-------------------------------------|
| Heptane                      | inhalation | LC50 Rat: > 29.29 mg/L (4 hr)       |
|                              | oral       | LD50 Rat: > 5000 mg/kg              |
|                              | dermal     | LD50 Rabbit: >2000 mg/kg            |
| Hydrocarbons, C7, n-         | oral       | LD50 Rat: > 5000 mg/kg              |
| alkanes, isoalkanes, cyclics | dermal     | LD50 Rabbit: > 2000 mg/kg           |
|                              | inhalation | LC50 Rat: > 4.42 mg/L (4 hr, vapor) |

## Skin corrosion/irritation

#### Assessment:

Causes skin irritation

Product data:

No data available.

#### Substance data:

| Name   | Result                  |
|--|-------------------------|
| Heptane  | Causes skin irritation. |
| Hydrocarbons, C7, n-<br>alkanes, isoalkanes, cyclics | Causes skin irritation. |

#### Serious eye damage/irritation

Assessment: Based on available data, the classification criteria are not met.

#### Product data:

No data available.

Substance data: No data available.

#### Respiratory or skin sensitization

Assessment: Based on available data, the classification criteria are not met.

Product data:

No data available.

Substance data: No data available.

#### Carcinogenicity

Assessment: Based on available data, the classification criteria are not met.

## Product data: No data available.

## Substance data:

| Name   | Species | Result   |
|--|---------|--|
| Hydrocarbons, C7, n-<br>alkanes, isoalkanes, cyclics |         | The carcinogenic classification applies to naphtha streams containing >0.1% Benzene. |

International Agency for Research on Cancer (IARC): None of the ingredients are listed. National Toxicology Program (NTP): None of the ingredients are listed.

## Germ cell mutagenicity

Assessment: Based on available data, the classification criteria are not met.

Product data:

No data available.

Substance data:

| Name | Result   |
|------|--|
|      | The mutagenic classification applies to naphtha streams containing >0.1%<br>Benzene. |

#### Reproductive toxicity

Assessment: Based on available data, the classification criteria are not met.

#### Product data:

No data available.

#### Substance data:

| Name | Result   |
|------|--|
|      | The classification as a reproductive toxicant only applies when the naphtha stream contains >3% toluene and/or n-hexane. |

#### Specific target organ toxicity (single exposure)

#### Assessment:

May cause drowsiness or dizziness

Product data:

No data available.

#### Substance data:

| Name   | Result                             |
|--|------------------------------------|
| Heptane  | May cause drowsiness or dizziness. |
| Hydrocarbons, C7, n-<br>alkanes, isoalkanes, cyclics | May cause drowsiness or dizziness. |

#### Specific target organ toxicity (repeated exposure)

Assessment: Based on available data, the classification criteria are not met.

Product data:

No data available.

Substance data: No data available.

#### Aspiration toxicity

Assessment: Based on available data, the classification criteria are not met.

Product data:

No data available.

#### Substance data:

| Name   | Result  |
|--|---|
| Heptane  | May be fatal if swallowed and enters airways. |
| Hydrocarbons, C7, n-<br>alkanes, isoalkanes, cyclics | May be fatal if swallowed and enters airways. |
