60-SERIES
MODEL 1160

If you need additional unloading auger side-reach and height, look to the Unverferth **60-Series** lineup of corner-auger grain carts. The side-folding design allows the upper auger to be longer, so you can reach over ditches and clear the tallest trucks. Tank capacities range from 630 to 1,300 bushels and unloading speeds up to 500 bushels per minute to get you back to the combine faster.

The standard side-to-side turret downspout with 4-way option increases unloading accuracy and steep tank slopes with sump design ensures complete cleanup. Choose from 42" Equalizer® tracks, 36" traditional tracks, high-flotation single wheels and tires, scales, camera and roll-tarp (std. on 1160).
