

## FUNGICIDE PROGRAMS 2026

The window to apply fungicides is upon us and Midway Co-op has product options and programs to fit your operation in 2026. For Midway Co-op Seed customers, we also can offer a warranty program called [Impact Rx](#) to share production risk that may impact your decision making. Remember, if you wait till you see it, yield loss has occurred.

### Options For Corn:

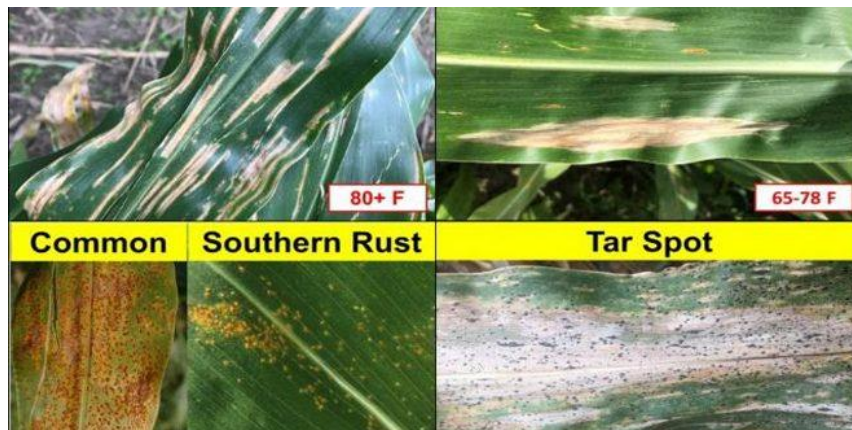

**Veltyma** (BASF) @ 7 oz/ac with 4 oz Masterlock = \$21.52/ac (*available for [Impact Rx](#) \$20/ac warranty*)

**Adastrio** (FMC) @ 7 oz/ac + 4 oz MLock = \$19.70/ac

**Rustease** (Winfield) @ 5 oz/ac + 4 oz MLock = \$7.50/ac

*\*Application cost not included-varies by application method*

Additionally with High Fertilizer costs you may be short on Nitrogen and with recent rains be considering XRN along with the fungicide? For July & August we are discounting **Kugler XRN** to \$7.60/gal if it's applied aerially or by ground when tank mixed with a fungicide.

## Advanced Acre® Rx Prescription Offer Crop Year 2026 Corn and Soybean

### AGRONOMIC BENEFITS

- **Corn:** Pairing a fungicide with MasterLock® adjuvant can improve the performance of the fungicide by on average 5.7 bu/A. MasterLock helps drive fungicide deeper into the canopy which means more fungicide on the ear leaf. Using fungicide with hybrids that have a medium or high response to fungicide improves the impact of the application.
- **Soybeans:** Pairing a fungicide with MasterLock adjuvant can improve the performance of the fungicide. MasterLock helps drive fungicide deeper into the canopy to help protect flowers and pods that are deeper in the soybean canopy.

<b>BASF Impact Rx™</b>	\$4/Acre*
------------------------	-----------

Corn		Soybeans	
Approved Yield	Warranty	Approved Yield	Warranty
95%	\$20.00	95%	\$17.00
100%	\$16.00	100%	\$14.00

Prescription Requirements	Prescription Requirements
<ul style="list-style-type: none"> <li>• Seed purchased from WinField United and the local retailer with a moderate or high Response To Fungicide (RTF) rating.</li> <li>• Qualifying V10-R1 foliar application of Veltyma fungicide and MasterLock.</li> </ul>	<ul style="list-style-type: none"> <li>• Seed purchased from WinField United and the local retailer.</li> <li>• Qualifying R2-R3 foliar application of Revytek or Revylok fungicide and MasterLock.</li> </ul>

*Additional program details apply.  
For more information please see the Advanced Acre® Rx grower contract.*

\* Yield below 80% of Approved Yield will result in void and return of AARx fees

---

## **SERVICE PRESCRIPTION PROVIDED BY A LOCAL EXPERT**

### **Soil Assessment:**

- In-season scouting to identify correct plant stage to apply products
- Application timing based on scouting and local recommendations

**Prerequisites (required):** *the following must be in place and validated by a local expert to qualify for this offer*

- Field must be clean of weeds with an acceptable plant stand
- Grower must have purchased a qualifying seed from WinField United and the local retailer
- Seed must be treated based on best local recommendations to mitigate early season stress (i.e. fungicide, insecticide and additional disease and pest resistance where needed)
- Fertility plan sufficient to meet or exceed approved yield target

## **PRESCRIPTION SERVICE AND PERFORMANCE WARRANTY**

- The offer includes a prescription serviced by WinField United through participating Advanced Acre® Rx retailers. The prescription service includes a scientifically based crop plan, in-season monitoring and advice from a local expert.
- The prescription service includes a performance warranty based on the minimum yield for the enrolled acres in the plan. If the grower complies with the prescription and if the actual yield for all acres enrolled in the prescription falls below the Approved Yield percentage listed above, grower may be entitled to recover the warranty claim listed above. This prescription service is warranted to achieve applicable yield outcomes.
- The agronomic prescription service begins with product recommendations; those recommendations are designed to deliver more predictable target yields and increase potential for return on investment based on WinField United agronomic data. Field-specific recommendations of additional products may be made to growers to adjust to in-season crop conditions and field-specific characteristics.
- The Service Warranty does not protect against "Acts of God." Yields below 80% of the Approved Yield are considered an "Act of God" and result in a refund of Service.

## **PROGRAM DESCRIPTION:**

- Follow the agronomic and data backed prescription. If you do not achieve the Approved Yield target, a service warranty payment will be issued.

## **AGREEMENT**

- This offer represents an agreement between WinField United and the grower.
- The participating retailer will be acting as an execution agent for this WinField United offer.
- The grower must provide accurate historical yield data on enrolled acres to establish the described Approved Yield and must have federal crop insurance on designated field.
- The WinField United delivery of this service, and growers' participation in this service offering are subject to the terms and conditions provided in the Advanced Acre Rx grower participation agreement.
