

LET'S TALK ADJUVANTS

<p>InterLock[®] By WINFIELD UNITED</p>	<p>InterLock helps aid/improve spray pattern deposition and is an anti-drift agent, improving product performance and coverage. InterLock works effectively with Herbicides, Insecticides, Fungicides and Desiccants. This drift control agent can be used for both ground and aerial application. <u>Rate:</u> 80-120ac/jug – standard rate is 100 acres/jug & always add into your tank mix last!</p>
<p>MasterLock[®] By WINFIELD UNITED</p>	<p>MasterLock is a non-ionic surfactant plus is a drift control and deposition agent. It features new Drop Tight surfactant technology while still providing the drift control that is proven with Interlock – all while increasing spray coverage within the crop canopy. MasterLock minimises droplet bounce and boosts droplet sticking & spreading. This new all-in-one product is registered for both ground and aerial application.</p>
<p>Crimson[®] NG By WINFIELD UNITED</p>	<p>Crimson NG is an ammonium sulphate (AMS) based product used for water conditioning situations to help prevent herbicide antagonism.</p> <ul style="list-style-type: none"> • It is designed for use with pesticides that may be <i>affected by hard water</i> or challenging application conditions. • Enhanced formulation now contains antifoam for added convenience. <p><i>Most commonly used with: Glyphosate</i></p> <div data-bbox="1114 743 1503 921" style="background-color: #4CAF50; color: white; padding: 10px;"> <p>Water quality can affect Groups 1, 9, 10 and 27. Test your water and add Crimson NG for optimum performance.</p> </div>
<p>Journey[®] HSOC By WINFIELD UNITED</p>	<p>Journey HSOC is a methylated seed oil (MSO) based surfactant blend, including MAX-IN Technology for increased droplet coverage and spread.</p> <ul style="list-style-type: none"> • It actively dissolves the waxy cuticle allowing for more active ingredient uptake and absorption into weeds. • Aids in performance of herbicides under stressful, hot or dry conditions – as well as on large weeds, in particular grassy weeds. <p><i>Most commonly used with: Marshall, Assure II, as well with glyphosate tank mix partners requiring an oil adjuvant.</i></p>
<p>Destination[™] MSO By WINFIELD UNITED</p>	<p>Destination MSO contains a methylated seed oil (MSO) as well as emulsifiers.</p> <ul style="list-style-type: none"> • Helps with the process of breaking down waxy leaf surfaces, leading to improved herbicide uptake and performance. <p><i>Most commonly used with: Refine SG, Marshall Unpacked, Coragen Max, Assure II, Antler 360 & Insight Liquid SC</i></p> <div data-bbox="1013 1289 1487 1549" style="border: 1px solid #ccc; padding: 5px;"> <p>OIL ADJUVANTS HELP PESTICIDES TO PENETRATE INTO THE LEAF SURFACE</p> </div>
