

SUNRISE INTERNSHIP PROGRAM

The Sunrise Cooperative Internship Program provides a realistic preview of an agricultural and cooperative that focuses its expertise on growing our customer-owners success. We provide team-based solutions across multiple platforms including agronomy, grain, energy, precision agriculture and crop nutrition through our own PCT | Sunrise® brand.

We strive to build our team around individuals who are creative, out of the box thinkers that have a desire to be successful and evolve their career. Take an opportunity to build your professional experience in areas such as, but not limited to, agronomy, grain, energy and precision sales, operational procedures including planning, logistics, labor management and dispatching. Dive into data management, equipment installation and maintenance, soil and tissue sampling with guidance from our nationally-ranked Sunrise Precision Solutions (SPS) Team. Opportunities are offered to gain insights on crop nutrition, crop production and biological trials and product production of our branded PCT | Sunrise® lineup.

During our summer program you will work closely with a mentor to help guide you as you learn applicable skills to help ensure the future of the agricultural industry. In addition to your day-to-day responsibilities, you will have an opportunity to observe different career options through all departments at Sunrise.

The Sunrise Internship Program culminates with a summer project of the intern's choice to be presented to the Sunrise Senior Management Team. This project encompasses what the intern has learned through their internship and provides a chance to showcase an avenue of opportunity for Sunrise in the future. All interns who present a project get the opportunity to receive a Sunrise scholarship. A \$1,000 scholarship will be awarded to one individual.

The application window is September until the end of October, with internship positions offered in December. The application process is completed online at www.sunriseco-op.com/Careers/Job-Opportunities.

PRIMARY DUTIES:

- Learn about the products and services offered, along operational procedures of the Sunrise agronomy, energy, grain and precision teams.
- Lead the scouting efforts on fields assigned.
- Gain precision ag experience through soil and tissue sampling, analyzing results and making recommendations, as well as sales/installation of precision equipment.
- Develop marketing knowledge of products and participate in regional grower, sales and operation meetings.
- Expand operations management knowledge in planning, logistics, labor management and dispatching.
- Participate in education of farmers on our in-house risk management programs offered by Sunrise including VantagePointe®, Input Financing, Fertilizer Grain Program.
- Enhance knowledge around crop nutrition, crop production, biologicals and seed treatment products developed and sold through our PCT | Sunrise® brand.
- Provide excellent customer service and assist customers as needed.
- Complete a summer project and present it to the Sunrise leadership team. **All interns who present a project have the opportunity to receive a Sunrise scholarship.** One scholarship will be awarded.

SECONDARY DUTIES:

- Assist with all Sunrise plot activities
- Participate in bi-weekly regional meetings
- Attend all Sunrise training days assigned by Mentor
- Maintain all Sunrise equipment to company standards
- All other duties as assigned

PHYSICAL REQUIREMENTS:

- Ability to lift a minimum of 50 pounds.
- Ability to read, count, and write to accurately complete all documentation.
- Ability to work long varied hours/days as business dictates.
- Must be 18 years old and have a high school diploma or equivalent.
- **POTENTIAL HIRE WILL BE REQUIRED TO PASS A PRE-EMPLOYMENT DRUG SCREEN.**
