FEEDING DIRECTIONS FOR DRY COWS: Co-op Dry Cow Mineral is designed to be fed free-choice to dairy cows and springing heifers throughout the dry period on a non-legume forage diet. Consumption should be 4 to 6 oz per head per day but not to exceed 0.3 ppm of selenium in the total ration. If cattle consume more or less than these levels, feeder should be moved further or closer to the general resting or watering area. If cattle still fail to consume the correct amount, discontinue feeding this mineral and vitamin supplement.

CAUTION: Do not feed to sheep or other copper-sensitive animals.
