FEEDING DIRECTIONS: Feed at the rate of 2.77 to 5.55 lb per head per day for the first five days. Following this adjustment period, cattle should receive 2.77 to 11.10 lb per head per day of Co-op 14% Pelleted Beef Developer-RUM while having unlimited access to good quality forage and fresh clean water.

WARNING: A withdrawal time has not been established for pre-ruminating calves. Do not use in calves to be processed for veal.

CAUTION: Do not allow horses or other equines access to feed containing Monensin. Ingestion of Monensin by equines has been fatal. Monensin-medicated cattle feed is safe for use in cattle only. Consumption by unapproved species may result in toxic reactions. Do not exceed the levels of Monensin recommended in the feeding directions, as reduced average daily gains may result. If feed refusals containing Monensin are fed to other groups of cattle, the concentration of Monensin in the refusals and amount of refusals fed should be taken into consideration to prevent Monensin overdosing. Do not feed to sheep or other copper-sensitive animals.
