FEEDING DIRECTIONS:

For Beef Cattle on Pasture: Offer this product at the general rate of 1.00% of body weight daily along with good-quality forage free-choice for the first 5 days. Over the next 14 days, cattle may be gradually increased to 2.00% of body weight daily along with ample good-quality forage. This product contains no added copper. Offer appropriate Co-op beef cattle mineral along with forage and feed at all times. Offer clean, fresh water for ad libitum consumption.

For Maintenance of Mature Horses: Offer this product at the general rate of 0.75 to 1.25% of body weight daily depending on activity level and body condition along with good-quality forage. Make feed changes slowly. Offer one half of the daily feed in the morning and the other half in the evening. For unacclimated horses, begin feeding at the rate of 0.25% of body weight daily, slowly increasing over 10 days to previously recommended levels. This product contains no added copper. Offer appropriate Co-op horse mineral along with forage and feed at all times. Always offer clean, fresh water at all times.

For Finishing Sheep: Offer this product at the rate of 1.00% of body weight daily along with good-quality forage. After acclimating, lambs may be increased up to 2.50% of body weight daily along with good-quality forage. Offer clean, fresh water for ad libitum consumption.

For Finishing Goats: Offer this product at the rate of 1.00% of body weight daily along with good-quality forage. After acclimation, goats may be increased up to 2.50% of body weight daily along with good-quality forage. Offer clean, fresh water for ad libitum consumption.
