VISION IN PRECISION

Every field has variability.

How you manage that variability makes all the difference.

Our goal with this program is to help our growers make better decisions by managing each field's variability for a greater return on investment across every acre.

Not every acre is the same. By creating the right fertilizer and seed plan together, we can decrease wasteful spending and increase yield potential field-by-field.

Being a VIP has its Perks!

- ▶ VIP Member Only Pricing
- ▶ Increased Field-By-Field Management
- ▶ Unlimited Variable Rate Fertilizer Recs
- ▶ Unlimited Variable Rate Seed Recs
- ▶ Flat-Rate Check Strips Available
- ▶ End-of-Season Yield Analysis Reports
- ▶ Special VIP Apparel

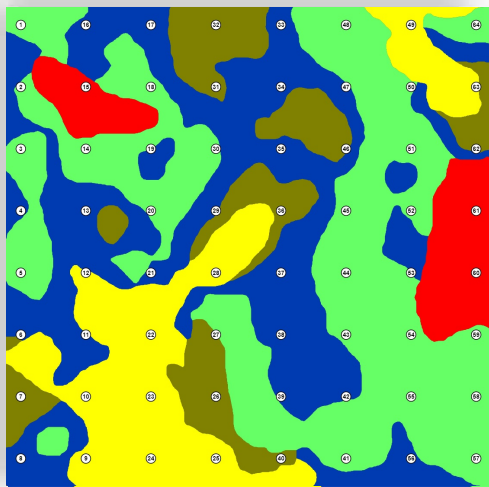

Grid Sampling

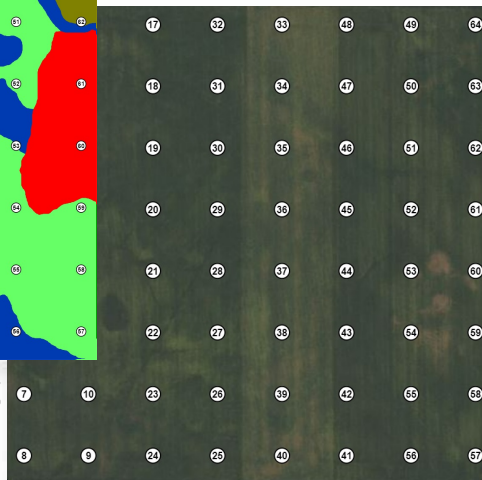

- ▶ At Least a 4-Year Rotation
- ▶ 2.5-Acre Grid or Smaller
- ▶ 10-Acre Grid for Manure Management Plans
- ▶ DS Lab Test Minimum Required
 - ▶ pH, BpH, OM, P, K, S, Zn
- ▶ Hybridized Grid
 - ▶ Grid Data Overlayed on a Zone Map with Multiple Yield Goals for Better Management and ROI

Zone Sampling

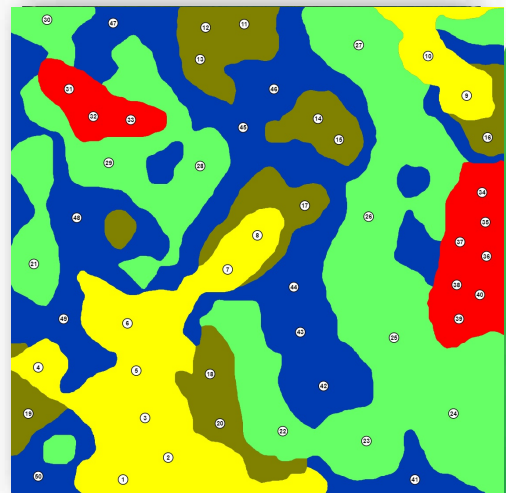

- ▶ At Least a 4-Year Rotation
- ▶ Each Zone is Composite Sampled Using Georeferenced Points for Better Accuracy Year-Over-Year
- ▶ DS Lab Test Minimum Required
 - ▶ pH, BpH, OM, P, K, S, Zn
- ▶ Use of Multiple Yield Goals for Better Management and ROI
- ▶ Reduced Lab Fees

Hybridized Grid Sampling
